# Capability Statement

**Research, analysis, and publication for scientific work.**

Scientific analysis and research communication come together through analytical reports, papers, and publication workflows.

**Starting at $5,000 per engagement**

## Core competencies

**Scientific research and computational analysis**

Research planning, scientific programming, data processing, and computational analysis scoped to the research question, evidence, and project objectives.

**Data curation and scientific interpretation**

Organization, quality review, analysis, and interpretation of research data and outputs for scientific teams.

**Research communication and publication**

Preparation of analytical reports, figures, papers, and structured review and revision workflows for scientific audiences.

## Who we support

Researchers, scientific teams, and science-driven organizations seeking analytical and research communication support.

# Research design and analysis workflow

Define the research question, available data, analytical methods, and intended audience before implementation.

## Scope of work

- Research question and analysis scope
- Computational workflow and method documentation
- Quality checks and interpretable outputs
- Limitations and assumptions stated with findings

## Workflow

01 **Define the research question**
Set objectives, scope, available data, methods, and intended audience.

02 **Prepare the analysis plan**
Choose computational methods and document assumptions and quality checks.

03 **Execute the workflow**
Process the data and retain records needed to reproduce the analysis.

04 **Review and interpret results**
Assess outputs against the evidence, assumptions, and project objectives.

05 **Report findings**
Communicate results, methods, and limitations in a reviewable format.

**Applications**
Research planning, scientific programming, data processing, and computational analysis for life and computational sciences.

**Scope note**
Methods and conclusions are limited to the evidence, data quality, and agreed scientific scope.

**Contributing teams**
Science, Ozcorp Scientific

## Suggested NAICS

541990 All Other Professional, Scientific, and Technical Services
541690 Other Scientific and Technical Consulting Services.

## Suggested PSC

AJ11, AJ12, and AJ13 General Science and Technology Research and Development.

# Scientific programming and data curation

Develop computational methods and organize research datasets to support analysis, reuse, and collaboration.

## Scope of work

- Scientific programming and data pipelines
- Research data curation and annotation
- Quality review and computational reproducibility
- Results organization for scientific review

## Workflow

01 **Specify data requirements**
Agree on input formats, provenance, annotations, and intended reuse.

02 **Curate research data**
Organize datasets and document quality or handling limitations.

03 **Build computational methods**
Implement analysis code and data processing for the defined question.

04 **Validate reproducibility**
Review outputs and record the steps required to repeat the workflow.

05 **Prepare research outputs**
Package curated data, code, and results for scientific review and collaboration.

**Applications**
Scientific data pipelines, dataset curation, annotation, and reusable computational workflows.

**Scope note**
Data handling, access, and reuse conditions are agreed for each engagement.

**Contributing teams**
Science, InfraOps

## Suggested NAICS

541511 Custom Computer Programming Services
541519 Other Computer Related Services
541990 All Other Professional, Scientific, and Technical Services.

## Suggested PSC

AJ11, AJ12, and AJ13 Research and Development
B524 and B529 scientific studies and analysis.

# Research reports and publication support

Translate project findings into clear technical and scientific materials for the intended audience.

## Scope of work

- Analytical reports and publication-ready figures
- Methods, limitations, and supporting context
- Scientific paper preparation and revision support
- Projects in multi-omics, molecular dynamics, and public health

## Workflow

01 **Set audience and requirements**
Confirm the intended readers, format, and publication or review criteria.

02 **Organize findings**
Select results and supporting methods relevant to the research question.

03 **Prepare materials**
Draft reports, figures, methods, and scientific narrative.

04 **Review and revise**
Incorporate client feedback and check consistency with source results.

05 **Deliver publication materials**
Provide the agreed report, figures, paper draft, or revision package.

**Applications**
Analytical reports, scientific figures, papers, and publication review and revision workflows.

**Scope note**
Publication decisions remain with the authors and venue. Results and claims are constrained by the underlying evidence.

**Contributing teams**
Science, Ozcorp Scientific

## Suggested NAICS

541990 All Other Professional, Scientific, and Technical Services
541690 Other Scientific and Technical Consulting Services.

## Suggested PSC

AJ11, AJ12, and AJ13 General Science and Technology Research and Development
B524, B529, and B544 studies and analysis.
